I am writing to show my concerns re the above regarding the LDP in the Powys County Council's FFC. I have already sent in a long letter setting out my views why I am against the FFC but I am now adding to this my concerns for the projected Solar Panels you are going to place over the Powys uplands and areas of beauty. This has not been debated amongst the people of Powys and shows an utter disregard for local opposition and , more seriously, a sneakily underhand way of the way you do business and push through projects with no proper discussions.

For instance to put solar panels all over Aberedw Hill has no regard for the infrastructure needed - roads, grid connectivity- and the destruction of tourism, wildlife and flora and fauna can not be right or legal.

I am totally opposed to anything without proper debate as is our constitutional rights as tax and council tax payers. Please do not push this through behind the county's back.
